**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 May 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

The amendment filed 5/10/04 has been considered in preparing this Office action.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-27, 29 and 33-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Rogers (6,064,407).

Rogers teaches a method (Figs. 2-4) for storing a block of tiled data on first and second memory channels in an interleaved pattern (Fig. 4) comprising receiving a set of parameters that describe the block of data from a source (step 30); determining a request address based on the parameters (step 32); translating the request address to corresponding first and second tiled address channels based upon the parameters (step 34), determining based upon selected tiled address bits (Fig. 4), a corresponding tiled address for the first channel; adding an offset to the first tiled address channel to produce a tiled address for the second channel (step 42); storing portions of the block of data in accordance with the first and second tiled addresses such that selected portions of the block of data are accessible at the same time via first and second memory channels (step 44). Therefore, at least claim 1 is anticipate by Rogers.

Claims 2-27, 29 and 33-37 add implementation details suggested by the generic teachings of Rogers as detailed above for claim 1, whereby claims 2-27 and 29 are anticipated by Rogers.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers (6,064,407) in view of Chowdhuri et al (6,674,443).

The teachings of Rogers are given in previous paragraph of this Office action. However, Rogers fails to explicitly teach or suggest a MPEG decoder. This is what Chowdhuri et al teaches (140). It would have been obvious to one of ordinary skill in the art at the time the present invention was made to combine the teachings of MPEG decoder of Chowdhuri et al into the system of Rogers in order to compress or decompress the image data and thus to improve memory usage (stored compressed data) and faster transmission (less data after compressed) of the image data over the bus. Therefore, at least claim 28 would have been obvious.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1-29 and 33-37 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kee M Tung whose telephone number is 703-305-9660. The examiner can normally be reached on Tuesday - Friday from 5:30 am - 4:00 pm.
